■ Version April 2018

NOTE Please read the entire installation manual before you start installation and assembly.

WARNING

- Do not begin to install your QualGear product until you have read and understood all the instructions and warnings contained in this installation manual. If you have any questions regarding the instructions, for US customers please contact QualGear customer support via email at support@qualgear.com. For all international customers, please contact your local distributor.
 - This product should only be installed by someone of good mechanical aptitude, has experience with basic building construction, and fully understands these instructions.
 - This product was designed to be installed and utilized only as specified in this manual. Improper installation of this product may cause damage or serious injury. QualGear is not liable for the improper use or installation of its products.
 - Make sure that the supporting surface will safely support the combined load of the equipment and all attached hardware and components.
 - Always use an assistant or mechanical lifting equipment to safely lift and position the equipment.
 - This product was designed to be installed on the following wall construction only:
- Tighten screws firmly, but do not over tighten. Over tightening can damage the items, greatly reducing their holding power.
 - ALL QUALGEAR products are intended for indoor use only and any outdoor use voids the limited warranty.
 - ALL QUALGEAR products are designed and tested for residential use only and any commercial use voids the limited warranty. For warranty information, please visit <http://www.qualgear.com/warranty.php>.
 - If mounting to wooden studs, make sure that mounting screws are anchored into the center of the studs. Use of an edge-to-edge stud finder is highly recommended.
 - Never exceed the maximum rated weight specified in this manual.
 - All bolts and screws must be used at the designated points in the installation instructions to prevent property damage and/or personal injury.
 - DO NOT install near air conditioner vents or where there is excessive dust or smoke.
 - When drilling holes in the wall, it is very important to take care of electrical cables, water, or gas pipes in the wall.

Parts Checklist

IMPORTANT: Before starting installation, please check that all parts shown in this checklist are included. If any parts are missing or damaged, contact your local distributor or support@qualgear.com for replacement parts and do not start assembly and installation until you receive all the parts.

Hardware Package

1 Installing the Decorative Covers

NOTE

When decorative covers are installed correctly, there will be a gap between the bottom of the wall plate and the decorative covers. This gap is for the safety bar installation on Step 5.

Attach the decorative covers to the wall plate using the screws.

2a Mounting to a Wooden Stud Wall

NOTE

For concrete wall mounting, follow Step 2b.

Using an edge-to-edge stud finder, find the edges of the stud.

Using a level, mark the centerline of the stud.

Using the marking template (H) provided, mark four holes for drilling on the centerline of the stud.

Using a power drill and 3/16" drill bit, drill pilot holes of 3/16" (4.5 mm) diameter and at least 2.5" (65 mm) depth.

Mount the wall plate (A) and tighten it with the provided lag bolts (W-A) and D6 washers (W-C) using a socket wrench.

NOTE

Do NOT use power drill and do NOT over tighten the lag bolts.

! WARNING

- Make sure that mounting screws are anchored into the center of the studs. The use of a stud finder is highly recommended.
- Installers are responsible for providing hardware for other types of mounting situations.
- Installers must verify that the supporting surface will safely support the combined weight of the equipment and all attached hardware and components.

SKIP TO STEP 3 →

2b) Mounting to a Concrete Wall

H Marking Template

Hold the marking template (H) provided against the wall where you want to install the TV, mark six holes for drilling.

Using a power drill and a 3/8" masonry drill bit, drill mounting holes of 3/8" (10 mm) diameter and 2.7" (70 mm) depth at the marked locations in the previous step.

NOTE

Do NOT use power drill and do NOT over tighten the lag bolts.

3 Place concrete anchors (W-B) in each hole. Tap each anchor flush with the wall using a hammer. Using a socket wrench, mount the wall plate (A) and fasten them with the provided lag bolts (W-A) and D6 washers (W-C).

! WARNING

- Installers must verify that the supporting surface will safely support the combined weight of the equipment and all attached hardware and components.

3a Installing to a Flat Back Panel of a TV

Choose the appropriate screws and washers according to the type of your TV, and attach adapter brackets (C and D) to the back of the TV using a Phillips screwdriver.

D Right Adapter Bracket

C Left Adapter Bracket

Top Backside of the TV

IMPORTANT!

Tighten all screws but do NOT over tighten

Top of the TV

NOTE

According to the direction indicator arrows on the adapter brackets, make sure the adapter brackets are installed in the correct direction.

3b) Installing to a Curved or Recessed Back Panel of a TV

D Right Adapter Bracket

C Left Adapter Bracket

IMPORTANT!
Tighten all screws but do NOT over tighten

Recessed Back Panel

OR

Curved Back Panel

NOTE

According to the direction indicator arrows on the adapter brackets, make sure the adapter brackets are installed in the correct direction.

Choose the appropriate screws, washers, and spacers (if necessary) according to the type of your TV and attach adapter brackets (C and D) to the back of the TV using a Phillips screwdriver.

4) Hooking the TV onto the Wall Plate

HEAVY!
Use an assistant for this step.

With an assistant, hook the TV onto the mounted wall plate.
